### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The catalyst composition as claimed wherein the catalyst comprising a zirconia supported, alkali-metal-modified, ruthenium catalyst disposed over a porous substrate when combined with the method of making said catalyst, as presented in the 37 CFR 1.132 Declaration dated 8/6/2008, the combination is missing in the prior art of record. Applicant's convincing arguments wherein catalysts made of the same material but calcined and reduced under completely different temperatures do exhibit different performance properties. Examiner agrees with the previously submitted Declaration by Dr. Hu which states that: The catalysts made in the examples of the captioned application were calcined in air at 350 °C and reduced in H<sub>2</sub> at 110 °C. In contrast, the catalysts in U.S. Patent No. 3,461,183 were calcined at 850 °F (450 °C) and reduced in H<sub>2</sub> at 1000 °F (540 °C). These are significantly different conditions and would be expected to produce Ru/K/support catalysts having different properties, even if the catalysts had the same elemental composition.
2. Therefore, though the catalyst of the prior art is made of the same material, the performance will not be the same as that claimed since the catalyst were prepared under different processing conditions.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
